

# Creative Thinking for Problem Solving

## Course Description

This workshop is a structured approach to out-of-the-box thinking. You'll learn real-world tools and techniques you can use alone and with your teams to help solve complicated problems when a solution is not readily apparent.

## Outcomes:

- Better and more innovative decisions
- The ability to solve problems that felt like “stumpers”
- More fun and job satisfaction

## Course Outline

- Why we become less creative as we get older
- Real-World practices we can put in place to bring creativity back
- A step-by-step method to solve problems creatively
- How to rationally evaluate creative ideas
